

ANNUAL REPORT 2017-18

The year was hard on the organization as Fund raising was zero and so ACT had to make a compromise to keep its programmes running. We had to let go of our rented place and shift to a Government school and focus all our activities on it. So the year 2017-18 saw ACT focus only on Education & Waste Recycling Activities.

Swachhta Pakhwada – AWARENESS ON CLEANLINESS : Awareness on Cleanliness needed to be imparted to the Government School Children . Drawing Competition was conducted with the School children after and education session . The topic for this event was Swachh School , Swachh Mohalla and Swachh Ghar. The children were very enthusiastic and came up with beautiful pics . Out of these three were selected and awarded.

Out of this only three best drawings were selected for the prize. These are given below .

2nd Prize

1st Prize

3rd Prize.

JOYFUL LEARNING ACTIVITIES :

“Education is what is left behind after the textbooks have been forgotten”. If this is indeed so, then lets embark on the journey of making education a joyful experience.”

To facilitate this “**Action in Community and Training**” working in the Govt. Middle school Lakkarpur Village organised Joyful learning experience for the students in this school.

Digital Literacy : (class 8 students) The enchanting world of digitisation is still untouched by these poor children. It remains a curiosity for them as what does this big box do . Theoretically they were aware of

it but practically they needed the experience to familiarise with it. We do our bit to empower them atleast in getting connected through the world of e-mail and browsing the internet.

Music and Rhythm : (class 7 students) Children love to sing and dance but the humdrum of modern education system has just taken away all their pleasure. Lets get that Music and rhythm back into their lives and impart learning through this new way .

Creative Learning : (Class 6 students) The brain responds well when it is into doing and create things. The list of what students can create across the curriculum is virtually limitless. Art and craft activities will touch upon the creative nature of the students to enhance their horizons in practical work.

Story Telling Sessions: (class 5 students) Everyone loves a good story. All students enjoy a good story and never forget the values taught through these stories . Gone are the days when a granny used to tell the stories to the children . Lets bring back that charm and fun in the lives of these children through Story telling learning.

Action in Community and Training arranged for the volunteers to conduct these activities with the mentioned classes of students on the said days. With co-operation of Volunteers along with the teachers we were able to facilitate these activities effectively .

WASTE TO LIVELIHOODS : Though the UNDP funding had come to a close but we could keep the project alive by marketing the products made from the recycled paper made at our centre . Conference folders and note books along with Name tags and pen constituted the conference Kit. Our clients for this have been National Institute for Urban Affairs, National Foundation of India
